WHITEPAPER

Kreme Street is more than just a memecoin; it's a movement that merges entrepreneurial spirit with the transformative potential of Web3 technologies. Built on the Kaspa BlockDAG ecosystem, Kreme Street stands as a pioneering force that leverages innovation to create real-world utility for the $KAS token. By building businesses that integrate seamlessly with blockchain technology, Kreme Street amplifies the value of $KAS, establishing a dynamic ecosystem where creativity, collaboration, and cutting-edge financial tools converge. The $KREME token acts as a gateway to this vision, fueling liquidity, empowering future listings, and creating vibrant new liquidity pools that strengthen the Kaspa ecosystem. Through this synergy, Kreme Street fosters a thriving marketplace where ideas flourish and opportunities abound.

At its core, Kreme Street is a celebration of freedom of thought, expression, and self-realization. Its vision encourages individuals to embrace their authentic selves while boldly exploring the future of decentralized financial systems. With a commitment to innovation and creativity, Kreme Street empowers entrepreneurs and blockchain enthusiasts to break boundaries and reimagine the possibilities of Web3. By intertwining purpose and passion, Kreme Street not only champions the utility of $KAS and $KREME tokens but also nurtures a community driven by shared values and a fearless commitment to progress. Together, this brand is shaping a future where financial empowerment meets unbounded imagination, transforming dreams into reality on the decentralized stage.

The KREME token is committed to supporting and enhancing the Kaspa ecosystem and its diverse communities. Inspired by the growth and synergy within Kaspa's expanding community, Kreme Street recognizes that the path to building a strong and sustainable ecosystem lies in mutual support among all groups.

Kreme Street seeks to foster a dynamic and engaging culture within Kaspa by offering valuable insights into various projects, providing timely updates on technological innovations, and promoting collaboration across communities. By embracing a fun and light-hearted approach, Kreme Street aims to strengthen connections and drive broader adoption within the ecosystem.

The Kreme Street community is an innovative movement where creativity and blockchain technology converge. With its foundation built on Kaspa's cutting-edge KRC20 protocol, Kreme Street is shaping a bold vision to establish itself as a premier

entrepreneurship brand. Beyond being a token, KREME serves as a gateway to a vibrant ecosystem featuring memes, online retailers, games, AI agents, and more—all crafted to inspire joy and connect people on a global scale. For those seeking to engage with a project that combines purpose and innovation with free enterprise, KREME offers a compelling opportunity to collaborate within a forward-thinking and dynamic community.

Kreme Street's appeal extends further with its commitment to revolutionizing eCommerce on the Kaspa BlockDAG. The initiative to develop a marketplace where KAS and KREME are accepted as currencies marks a significant step in advancing blockchain adoption. For individuals enthusiastic about shaping the future of cryptocurrency, KREME provides a unique platform to contribute to a project that blends innovative technology with meaningful impact. By bridging blockchain innovation with artificial intelligence, we look to join the transformative movement redefining how people experience finance, creativity, and connection. The Kreme Street community represents an exciting opportunity to be part of something groundbreaking, innovative, and uniquely rewarding.

1. Kaspa BlockDAG

The Kaspa BlockDAG (Directed Acyclic Graph) is a groundbreaking advancement in blockchain technology, designed to overcome the limitations of traditional single-chain architectures. Unlike conventional blockchains that process transactions in a linear sequence, Kaspa's BlockDAG enables multiple blocks to be created and confirmed simultaneously, making it the fastest, open-source decentralized and fully scalable Layer-1 in the world.

This parallel structure vastly increases the throughput, allowing for faster transaction times and greater scalability without sacrificing security or decentralization. The BlockDAG also maintains the core principles of proof-of-work, ensuring a high level of security while fostering true decentralization. By eliminating bottlenecks and enabling instant confirmation of transactions, Kaspa's BlockDAG represents the future of blockchain technology, offering an efficient, scalable, and decentralized solution for global adoption.

2. Kasplex KRC-20

Kasplex serves as the essential infrastructure for building flexible solutions on the Kaspa network, streamlining project launches with its powerful three-part system: Protocol, Indexer, and APIs. The KRC-20 token standard sets the rules for creating and managing tokens on Kaspa, ensuring consistency and interoperability across projects. With Kasplex's open-source indexer, developers and users can easily access, retrieve, and verify data for KRC-20 tokens, NFTs, and other digital assets on the network. This robust framework empowers seamless innovation, making it easier than ever to build and scale on Kaspa's decentralized ecosystem.

3. Tokenomics

KREME tokens are designed to be accessible to everyone in a fair and sustainable manner. There are no presales for KREME to ensure a level playing field for community

members to access tokens. The KREME token will have 90% of the total supply available for Public Mint. Five percent of the total supply is pre-allocated to aid in the growth of the community in a transparent fashion through future CEX/DEX listings. Three percent of the total supply is reserved to reward community members for participating in contests, events, and helping build the Kreme Street community. The remaining 2% will be pre-allocated for the development team as a special thanks for the launch and continued development of the Kreme Street ecosystem.

- Ticker: KREME
- Standard: KRC-20
- Total Supply: 177,700,700,700 KREME
- Tokens Per Mint: 377,000 KREME
- Mint Opportunities: 423,662
- No Taxes on transactions other than Kaspa Gas, Bot, or Exchange fees.

Initial Distribution

- 90% Public Mint (159,720,630,630 KREME)
- 5% CEX/DEX Listings (8,885,035,035 KREME)
- 3.17% Community Rewards (5,646,888,295 KREME)
- 1.94% Development Team (3,448,146,740 KREME)

4. Conclusion

KREME is dedicated to building a transparent, fun, and entertaining ecosystem for its community. As we embark on becoming an integral part of Kaspa's historical rise, our vision is clear and well-positioned for success. Join us in this incredible journey to show the world why Kaspa is the best decentralized ecosystem!

5. Disclaimer

KREME is a meme coin with no intrinsic value. Be sure not to invest money you cannot afford to lose. KREME does not constitute an investment contract. Be sure to protect your Kaspa wallet to keep your tokens safe. The price may fluctuate, and we are not liable for the tokens price. Additionally, we are not responsible for any losses that may occur.
